SECTION		PAGE NUMBER
PARTS EXPLOSIONS	FOR 1/10 & 1/12th CAR Nos. 5848, 5851, 5854, 5855 5856, 5857, 5858, 5859, 5860, and 5861 FOR 1/24th TAMTECH SERIES CARS 2101 and 2103	PX-1 THRU PX-60 PX-61 THRU PX-64
SECTION 1	LIST OF CURRENT CARS AND POWER SOURCES INDIVIDUAL CARS SPECIFICATIONS & PARTS LISTS (1/10th and 1/12th SCALE CARS)	1- 1 1-2 THRU 1-55
	LIST OF CURRENT CARS & POWER SOURCES INDIVIDUAL CARS SPECIFICATIONS & PARTS LISTS (1/24th SCALE TAMTECH SERIES CARS)	1-56 THRU 1-58
SECTION 2	PICTORIAL (Alpha-numerical) LISTING OF ALL PARTS FOR CURRENT CARS (1/10th & 1/12th SCALE)	2-1 THRU 2-80
	PICTORIAL (Alpha-numerical) LISTING OF ALL PARTS FOR 1/24th SCALE TAMTECH SERIES CARS	2-81 THRU 2-84
SECTION 3	COMPATIBILITY LISTING OF ALL PARTS FOR CURRENT CARS (Alpha-numerical listing shows parts numbers and all current cars using part) FOR 1/10th and 1/12th SCALE CARS	3-1 THRU 3-20
SECTION 4	COMPATIBILITY LISTING OF ALL PARTS FOR DISCONTINUED CARS (Alpha-numerical listing shows parts numbers and all discontinued cars using part)	4-1 THRU 4-14
SECTION 5	SUGGESTED LIST PRICES FOR ALL PARTS	5-1 THRU 5- 4

HOW TO USE THIS GUIDEBOOK: Parts Explosion Section shows dwgs. & part nos. for cars shown. Page No. 1-1 will show you the complete listing of our current R/C car line and the car number. Once you find the car number you want you can then proceed through Section 1 to find the car specifications and parts for that car which are in car number numerical order. When you find the part number for the car you want on the individual car parts list, you can then look in the Pictorial Section 2 (listed in part number order) to see what the part looks like. Section 3 will show all the cars that use that part. Section 4 shows parts still available for discontinued cars. Section 5 shows suggested list prices. Specifications, prices and availability are subject to change without notice.

PARTS EXPLOSION SECTION

To further assist you in locating parts in this catalog, the following pages show Parts Explosions and MRC coordinating Part Numbers for the drawings shown.

We regret these Parts Explosions are not available for all the cars shown in this catalog.

We have included in this catalog all the cars for which these Parts Explosions are now available and we hope to have them available for new cars as they are released. The cars with Parts Explosions in this catalog now are as follows:

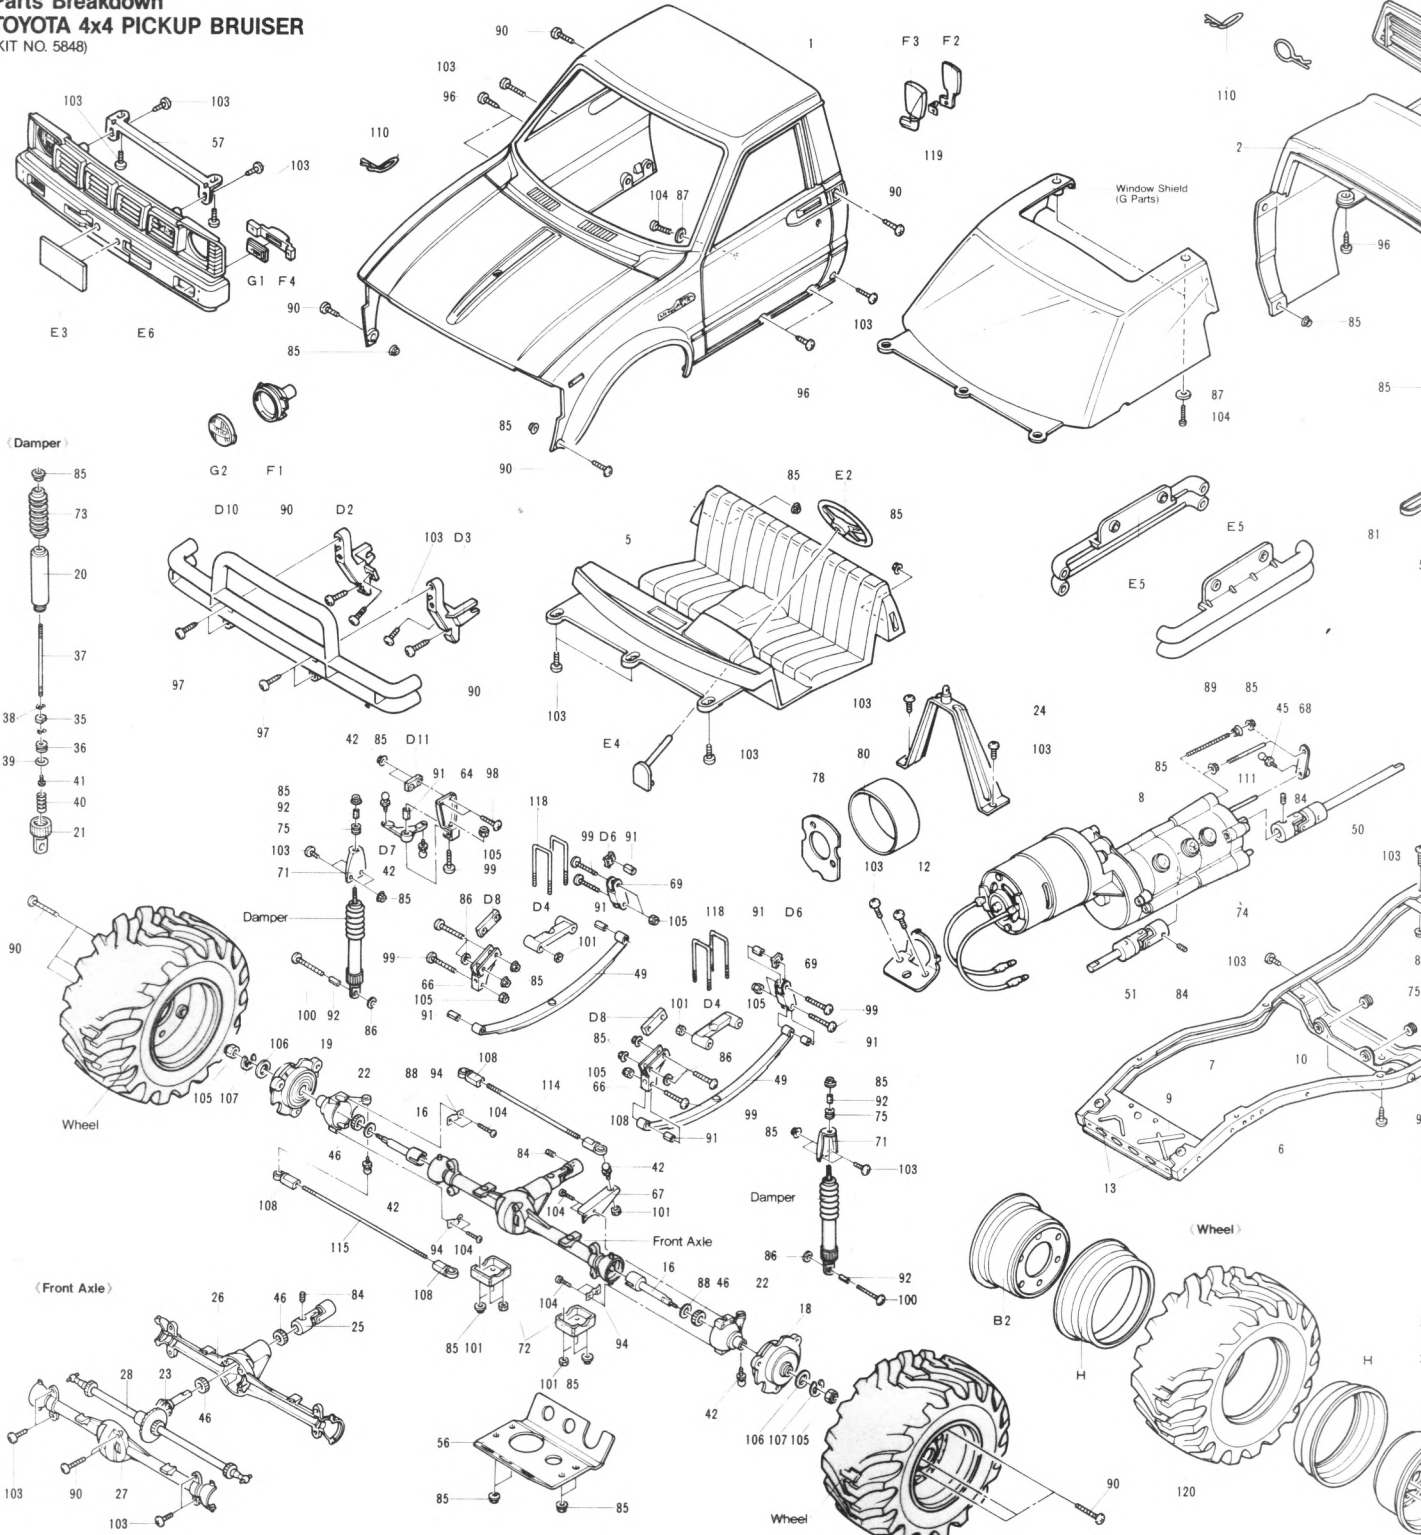

<u>Model Number</u>	<u>Model Name</u>	<u>Page Numbers</u>		
<u>1/10TH AND 1/12TH SCALE CARS</u>

Quick Charger RB475 for 7.2v and 8.4v 1200 MAH

FEATURES:

R/C OFF ROAD BUGGY WITH
4 WHEEL DRIVE
UNIQUE WEDGE SHAPE STYLING
LOW PROFILE BLOCK TIRES
AND LIGHTWEIGHT WHEELS
FRONT END IS DAMPED BY
MONO SHOCK & STABILIZER
REAR END USES 2 LARGE CAPACITY
OIL FILLED SHOCKS
ALL ADJUSTABLE TO ROAD CONDITIONS

PARTS LIST BOOMERANG #5855 1/10 SCALE 4WD OFF-ROAD HIGH PERFORMANCE BUGGY
 (BOTH ORIGINAL EQUIPMENT REPLACEMENT PARTS AND COMPATIBLE PARTS SHOWN)

#5860 MONSTER BEETLE 1/10TH SCALE

HIGH RISE OFF-ROADER

#5860 MONSTER BEETLE

SECTION 1

SPECIFICATIONS:

	mm	Inches
OVERALL LENGTH	410	16.14
OVERALL WIDTH	290	11.41
OVERALL HEIGHT	240	9.45
TIRE WIDTH		
Front/Rear	60	2.40
TIRE DIAMETER		
Front/Rear	130	5.12
MINIMUM GROUND CLEARANCE	50	1.97
APPROXIMATE WEIGHT	Grams	Pounds
(Without Radio System & Power Source)	2,300	8.99

FEATURES:

4 WHEEL INDEPENDENT SUSPENSION
 WITH ADJUSTABLE OIL DAMPERS
 STURDY ABS SPACE FRAME
 DETAILED INJECTION MOLDED BODY
 SEALED GEARBOX WITH DIFFERENTIAL

BODY Highly detailed injection molded styrene resin

FRAME ABS Resin Space Frame

SUSPENSION Front: Double Wishbone

Rear: Trailing Arm 4 Wheel Independent Suspension
 with 4 Coil Over Oil Filled Shocks

MOTOR 540 Type Motor
SPEED CONTROL 3 Step Forward/Reverse

RECOMMENDED:
RADIO SYSTEM 2 Channel, 2 Servo Digital Proportional, BEC System
 or Standard RC plus Tamiya Battery Eliminator

POWER SOURCE #RC-14 7.2v 1200 MAH Battery with slow charger

OPTIONAL POWER SOURCE: Battery Only RB431 (5508) 7.2v 1200 MAH
 Battery Only RB437 (5515) 7.2v 1200 MAH RACING PACK
 Quick Charger RB430 (5510) for 7.2v 1200 MAH
 Quick Charger RB460 for 7.2v 1200 MAH
 Quick Charger RB465 for 7.2v 1200 MAH
 Quick Charger RB475 for 7.2v and 8.4v 1200 MAH

MRC-TAMIYA PARTS FOR CURRENT RADIO CONTROLLED VEHICLES 1/10th & 1/12th SCALE

MRC Part No.	Tamiya Part No.	DESCRIPTION	CURRENT CAR KITS COMPATIBILITY
SP1005	5005	380 MOTOR SET	Subaru, Grasshopper
SP1015	5015	FUSE SET	Grasshopper, Hornet, Hotshot
SP1023	5023	540 TYPE MOTOR SET	Frog, Grasshopper, Pajero Hornet, Subaru, Monster Beetle, Striker, Hotshot II, Lunch Box
SP1025	5025	DOUBLE FACED TAPE	All Current Cars
SP1036	5036	BALL BEARING SET (2 Pcs.)	All Current Cars
SP1038	5038	TOOL BAG	All Current Cars
SP1039	5039	6v. BATTERY CONNECTOR	All Current Cars
SP1068	5068	BALL JOINT ADJUST ROD	All Current Cars
SP1073	5073	BALL BEARING SET (4 Pcs.)	All Current Cars
SP1105	5105	CIRCUIT BREAKER	All Current Cars
SP1106	5106	7.2v.CONNECTOR SET	All Current Cars
SP1112	5112	STICKER SET	Wild Willy, Subaru, Frog, Grasshopper, Pajero Bruiser, Hornet
SP1117	5117	U-JOINT	Wild Willy, Bruiser
SP1119	5119	FRONT SPARE TIRE	Subaru, Frog, Grasshopper, Pajero, Hornet
SP1120	5120	REAR SPARE TIRE	Subaru, Frog, Grasshopper, Pajero, Hornet
SP1121	5121	FRONT SPARE TIRE	Subaru, Frog, Grasshopper, Pajero, Hornet
SP1122	5122	REAR SPARE TIRE	Subaru, Frog, Grasshopper, Pajero, Hornet
SP1128	5128	UPRIGHT SET	Subaru, Frog
SP1144	5144	SPEC. BALL ADJUST SET	All Current Cars
SP1152	5152	HOLIDAY FRONT TIRE	Subaru, Frog, Grasshopper, Pajero, Hornet
SP1153	5153	HOLIDAY REAR TIRE	Subaru, Frog, Grasshopper, Pajero, Hornet
SP1156	5156	RANGER FRONT TIRES	Subaru, Frog, Grasshopper, Pajero, Hornet
SP1156R	5156R	RANGER REAR TIRES	Subaru, Frog, Grasshopper, Pajero, Hornet
SP1170	5170	NYLON BAND SET	All Current Cars
SP1171	5171	DOUBLE SIDED TAPE	All Current Cars
SP1173	5173	DIFFERENTIAL GEAR BAG	Porsche 956, Tom's, Road Wizard, Newman Porsche
SP1179	5179	WILD WILLY TIRES	Wild Willy
SP1180	5180	WILD WILLY BODY KIT	Wild Willy
SP1181	5181	WILD WILLY FRONT ARM SET	Wild Willy
SP1182	5182	3-STEP SPEED CONTROLLER	Wild Willy, Subaru, Frog
SP1183	5183	BUGGY SPIKE TIRES	Subaru, Frog, Grasshopper, Pajero, Hornet
SP1186	5186	SILICONE WIRE SET	All Current Cars
SP1189	5189	540 TYPE BLACK MOTOR -SPRINT	Subaru, Frog, Grasshopper, Pajero, Tom's, Porsche 956 Hornet, Newman Porsche

MRC-TAMIYA PARTS FOR CURRENT RADIO CONTROLLED VEHICLES 1/10th & 1/12th SCALE

MRC Part No.	Tamiya Part No.	DESCRIPTION	CURRENT CAR KITS COMPATIBILITY
SP1191	5191	SUBARU BRAT BODY	Subaru
SP1192	5192	SUBARU BRAT PINION GEAR	Subaru, Frog, Grasshopper, Pajero, Hornet, Falcon
SP1193	5193	ADJUSTABLE RACING SHOCK ABSORBERS	Subaru, Frog, Grasshopper, Pajero
SP1194	5194	RUBBER BAG SET	Subaru, Frog, Grasshopper, Pajero, Fox, Porsche 956, Tom's, Hornet, Newman Porsche
SP1195	5195	STEEL ANTENNA	Porsche 956, Hotshot, Fox, Wild One, Tom's, Supershot, Newman Porsche, Road Wizard, Boomerang, Hotshot II
SP1197	5197	SNAP PIN SET	Wild Willy, Subaru, Frog, Pajero, Tom's, Bruiser, Porsche 956, Grasshopper, Newman Porsche, Boomerang, Falcon, Bigwig, Blackfoot, Porsche 959, Monster Beetle, Striker, Hotshot II, Lunch Box
SP1200	5200	540 TYPE BLACK MOTOR ENDURANCE	Subaru, Frog, Grasshopper, Pajero, Hornet, Porsche 956, Wild One, Fox, Tom's, Newman Porsche
SP1204	5204	DIRECTLY CONNECTED SERVO SAVER	Subaru, Frog, Grasshopper, Pajero, Wild One, Fox, Hornet, Bruiser, FAV, Porsche 956, Tom's, Road Wizard, Newman Porsche, Supershot, Boomerang, Falcon, Bigwig, Blackfoot, Monster Beetle, Striker, Lunch Box
SP1205	5205	DIFFERENTIAL GEAR SET	Subaru, Frog
SP1206	5206	FROG BODY SET	Subaru, Frog
SP1207	5207	HALF SHAFT SET	Subaru, Frog, Wild One, Blackfoot, Monster Beetle
SP1208	5208	BUMPER AND UNDERGUARD	Frog, Grasshopper, Hornet
SP1209	DISCONTINUED ORDER SP1253 or SP1254		Grasshopper, Pajero, Hornet
SP1210	5210	GRASSHOPPER BODY KIT	Grasshopper, Hornet
SP1211	5211	CERAMIC RESISTOR 2 TERMINAL	Wild Willy, Subaru, Frog,
SP1212	5212	F2 RESISTOR	Grasshopper, Pajero, Wild One, Hornet, Bruiser, Boomerang, Falcon, Blackfoot, Monster Beetle, Striker

BIG BUG PARADISE

1/10 SCALE R/C OFF ROADER MONSTER BEETLE

NEW!

KIT NO. 5860

AN ODD COMBINATION TO BRING OUT THE MONSTER IN YOU

Remember the Volkswagen Beetle? That little street bug so popular amongst the young generation. Even in this age of sophistication, its popularity hasn't faded at all. It's still hanging around as strong as ever as a collectors item and an ideal base for those custom automotive creations. Tamiya's latest to join its ever growing R/C lineup, is a customized high-rise Volkswagen Beetle that's got the looks and action expected from a bug with big feet. 130mm, that's the diameter of the giant oversized semi-pneumatic rubber like tires utilized on this big one. Chunky 130mm diameter tires are just what you need to flatten out everything in your path and take on the rough stuff in style. No more will the little Beetle have to look up. This time around, it's the bugs turn to look down on the competition. The injection molded body of this Monster Beetle is most realistic in appearance and precisely detailed for the R/C enthusiast who want looks as well as performance. The kit also includes eye catching stickers that make it stand out from the others.

RELIABLE COMPONENTS FOR DURABILITY

Chassis construction, which support all of the vital components in a full sized automobile is just as important in R/C cars. Tamiya's Monster Beetle utilizes a track proven space type frame of light but sturdy engineering plastic that houses your valuable servos and receiver close to its center. This protects them from excessive shock during rugged use, and also contributes to lowering the center of gravity as much as possible. Front suspension is an independent double wishbone type

MONSTER BEETLE

while the rear is a trailing arm. Both are equipped with adjustable coil over oil filled damper units to handle any "Off the Road" chores you might want done.

THE EDGE ON STYLING, AND THE EDGE ON PERFORMANCE

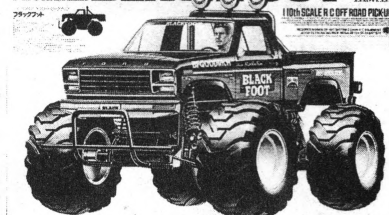

Constructed right out of the box, the Monster Beetle provides outstanding performance even for the critical R/C car enthusiast, despite its tall silhouette. The track proven powerful RS-540S motor puts out plenty of torque for driving those giant oversized tires. The sealed gear box pro-

tections the mechanics from debris, dust and moisture, and the differential gears allow tight cornering stability and positive control on any type of terrain. Running power is obtained from a regular or Racing Pack 7.2 V battery, mounted at the lowest point on the chassis for a low center of gravity. A 6V battery can also be used. The Monster Beetle can use either the Standard or BEC (Battery Eliminator Circuitry) proportional radio systems, when the user wants the receiver and servos to be powered by the cars running battery.

DIRT TRACK GRABBER

1/10 SCALE R/C OFF ROADER "STRIKER"

NEW!

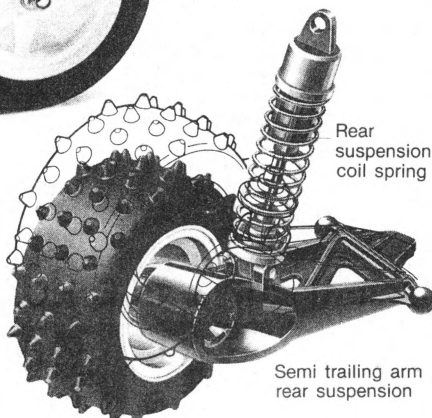

KIT NO. 5861

STRIKER

A NEW TREND IN BUGGY STYLING

Incorporate aerodynamics into an off roader and the "Striker" is what you get. This all new radio controlled buggy from Tamiya has a silhouette like a Formula One racer as seen on the Grand Prix circuits. The Striker, with its super styling and performance, is ideal for those just stepping into this exciting field of radio control buggy racing. From start to goal, its got striking acceleration and speed for the competitive edge. The sharp wind cheating body is of impact resistant styrene that's light and sturdy, and can be easily decorated using plastic paints. Box type chassis/frame has shaped locations for components with necessary holes pre-drilled.

Rear suspension coil spring

Semi trailing arm rear suspension

LIGHTWEIGHT HEAVY DUTY COMPONENTS

The box type chassis/frame is not only sturdy but allows easy access to your R/C unit for any adjustments. The unique drive shaft components are made of engineer-

ing plastic with metal reinforced inserts. These drive shafts have the flexible characteristics of plastic, to absorb shock and provide extreme durability for all rough terrain running. The kit includes the heavy duty three step forward and reverse speed controller that is designed to last and maintain its performance under tough operating conditions. The Striker incorporates 4 wheel independent, coil spring damped suspension with a swing axle type at the front and semi trailing arm suspension at the rear for excellent road hugging and plenty of traction. Front end is fitted with straight ribbed tires for crisp steering while the rear are spiked, for earth kicking traction.

WITH THE STRIKER, YOU GET MORE PERFORMANCE

Striking performance at an economical price...That's the Striker, and when you're ready to step up to more power, upgrade the car by using high performance parts such as the Technigold motor, ball bearings, oil filled dampers, and racing tires. The Striker can use either the standard or BEC (Battery Eliminator Circuitry) proportional systems, when the user wants the receiver and servos to be powered by the car's running battery.

AWESOME ECHOS

1/10 SCALE

R/C FULLTIME 4WD HOTSHOT II

NEW!

KIT NO. 5862

HOTSHOT II

POLISHED FOR WHITE HOT PERFORMANCE

The designers and engineers at Tamiya have had many breakthroughs in radio controlled off road buggy design, including the unforgettable Hotshot. It raised off-road competition to new heights through use of state of the art components like shaft driven four wheel drive mechanics, and a 4 wheel independent double wishbone suspension system. Now the Hotshot has returned to the starting grid once again, hotter and meaner than ever, polished and empowered by triumphs at the track. With a larger rear wing and a new slippery aerodynamic body styling, the Hotshot II is the meanest looking

machine yet! This aggressive look is enhanced by the bright orange and yellow stripes over a gloss black paint job.

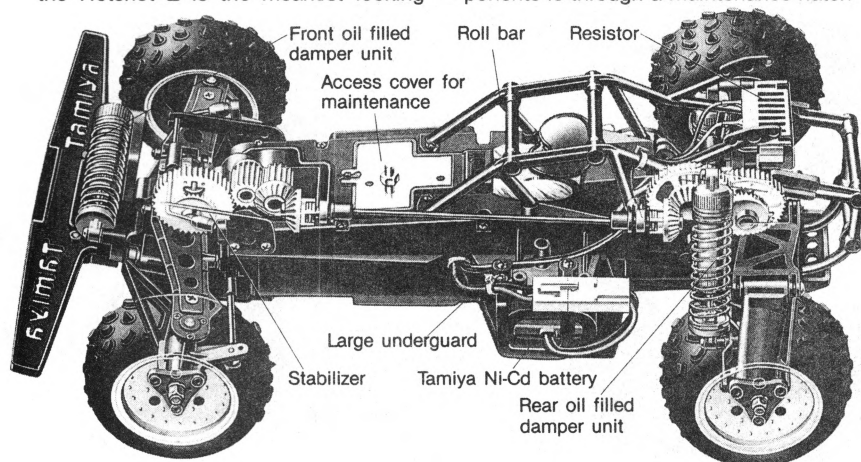

THERE'S MORE THAN MEETS THE EYE

Don't get the idea that we've only jazzed up the exterior. We leave that to the others. The concept behind the development of the Hotshot II is easier assembly and better maintenance access. The track proven monocoque type chassis, made from light and sturdy engineering plastic, keeps the dust and debris out, but allows you easy access to the mechanics for changing the crystal or adjusting and lubricating the speed controller. Access to these components is through a maintenance hatch

located on the top of the chassis. We've even made the chore of assembling a sophisticated 4WD buggy easier by doing some small things like tapping the uprights for flawless assembly. Race bred features like triple oil filled damper units, and full length underguard, that will satisfy the competition purists at the track.

THERE ARE NO LIMITS

Out of the box the Hotshot II is ready for the fast lane. By replacing the metal and plastic bearings, using a few sets of ball bearings, a dramatic increase in performance can be achieved. Swap the multi-purpose oval block semi pneumatic low profile tires for the competition pin spike tires. Implant the brutal Technigold motor for quicker acceleration. Expand your racing horizons to higher limits with the Hotshot II.

A GREAT APPETIZER

1/12 SCALE R/C MONSTER VAN "LUNCH BOX"

NEW!

KIT NO. 5863

TO WHET YOUR APPETITE

When one gets bored with their "Wheels" or wants something out of the ordinary—something no one else has...What can they do? How about simply fitting the car with outrageously oversized tires and create the wildest paint job a man can ever think of. Yes, this is the field of car customizing. It's made up of crazy and zany modifications that defy imagination or logic.

Call it nutty, call it outrageous, call it fun! Here comes the "Lunch Box" from Tamiya. A radio controlled custom Dodge van in 1/12 scale that has no worries what-so-ever about being confiscated by the authorities.

EASY HANDLING AND DYNAMIC PERFORMANCE

This electric powered radio control custom van is both easy to assemble and handle. Simple mechanics make the maintenance chores pleasant. Just like you were tuning up your own one-off custom vehicle. Simple but also sophisticated, that's the "Lunch Box" van. Chassis design and suspension systems are most important in determining the overall performance of any vehicle design, and there's not much room for compromise, whether it's a full-sized vehicle or a scale radio controlled model. The "Lunch Box" looks tough, and it is. With sturdy components like a box type resin frame/chassis, and a sealed gear box that includes a competition differential, etc., it's made tough inside and out. The 540 type motor puts out plenty of torque for driving those giant oversized tires. It's equipped with an independent swing axle suspension at the front and a rigid axle suspension at the rear, and all

LUNCH BOX

damped by heavy duty coil shocks. The "Lunch Box" is ready when you run out of paved roads, to travel the wild country. The tires that take that rough abuse from the rough terrain are semi-pneumatic, with a 115mm diameter and 71mm width. They are what provide the stability and great control. Power comes from a 1200mAh Ni-Cd 7.2V Racing Pack battery which is mounted at the lowest point on the chassis for the best CG. This high performance battery is matched to

a heavy duty speed controller that has 3 step forward and 3 step reverse, giving you the right power when you need it.

THE GLAMOUR OF CUSTOMIZING IS ALL YOURS

The popular Dodge van body is accurately depicted and has plenty of flat surface for you to test out your artistic talent. Front and rear bumpers, and exhaust mufflers (both sides) are chrome plated to enhance your one-and-only paint scheme. The impact resistant styrene injected molded body is not only easy to paint but allows you to modify the body in "who-knows-how-many" ways, like adding windows, wings, etc. With the "Lunch Box", you are the custom car craftsman who does the body work and paint job.

Hop up parts such as oil filled dampers, motors, ball bearings and even operating light bulbs are available for the radio control enthusiast who wants added power and performance as well as looks. Create the monster van of your dreams. Fun and fantasy, living happily ever after...Only with a Tamiya "Lunch Box".

Coil spring dampers can be replaced with optional oil dampers.

1/24 SCALE

RADIO CONTROL CAR SERIES

A PLEASANT SURPRISE IN THE WORLD OF R/C CARS

What R/C car has the latest technology, speed, action, and race car performance, plus precision scale appearance and fits right into the palm of your hand? Isn't this what you've been looking and asking for? Search no more, because now with Tamiya's Tamtech R/C car series, the sought after dream has come true. Tamiya started the idea of electric powered radio controlled cars in 1976 with the release of the legendary Porsche 934. That was a decade ago, and since then Tamiya has provided the world with a continuous output of progress and development, stimulating radio controlled car interest to new heights. This time around, Tamiya is taking another large leap ahead, with their Tamtech R/C car series.

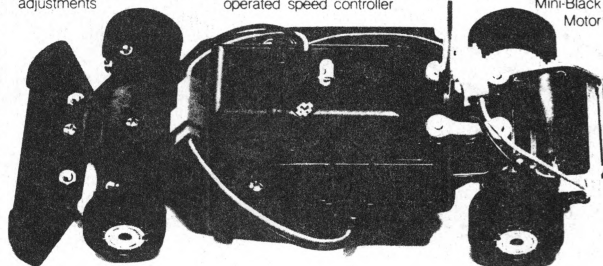

The designers and engineers at Tamiya have put their experience into about 20cm of precision radio control modeling, achieving unmatched excitement using minimum running space whether its in or outdoors. First out is the Porsche 962C endurance racer, that has been more than successful on the real racing scene, and with Tamiya's Tamtech series, only its full-sized counterpart could be better. No question about this one!

Adjusters allow easy steering adjustments

C.P.R. (Control Processing Receiver) Unit consists of receiver and amplifier operated speed controller

Precision differential gearing

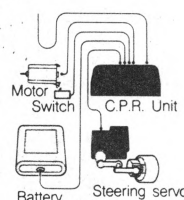

FK-180SH Mini-Black Motor

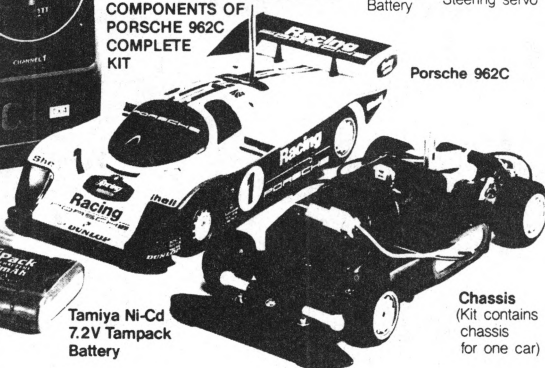

THE TAMTECH 201 R/C UNIT AND 7.2V TAMPACK BATTERY, IT'S ALL THERE FOR YOU

What's different about the Tamtech radio control car series is that all the necessary items, such as R/C unit and Ni-Cd battery are available just for this series. When you're new to the hobby it's nice to know that you have components that work together and not just what the hobby shop dealer might want you to buy. The Tamtech 201 two channel digital proportional radio system was developed through joint research with the Futaba Corporation in order to obtain the highest standard of performance. The amplifier operated speed controller and receiver are combined in the C.P.R. (Control Processing Receiver) unit that obtains its power from the running battery. The frequency crystals are changeable and different frequencies are presently available. The Tampack battery that provides power for the Tamtech R/C cars is a compact Ni-Cd battery developed exclusively for this hi-tech R/C car and consists of six powerful 1.2V-270mAh Ni-Cd batteries that enables breathtaking acceleration and performance. They're also economical because they can be charged more than 500 times, and each charge provides you with 8 - 15 minutes of pure racing enjoyment.

Charger varies according to country.

That doesn't mean we are not serious with our other products, only that these are so much smaller, requiring even more attention to detail. This we believe, is reason enough to get extra serious about the Tamtech series. In order to compensate with the high speed potential of the newly developed FK-180SH Mini-Black motor, the chassis is a full monocoque type using light and sturdy engineering plastics for running at the track. The state of the art chassis components are matched to a balanced front independent suspension system, damped by professional coil springs while the rear is a link type making a 3 point suspension system that keeps the car sticking to the track all the way. The high grip racing sponge tires are pre-fitted to the wheels making for easier assembly of this sophisticated model, and provides stability and control at all speeds. The Tamtech series R/C car utilizes a flexible, impact resistant body that is injection molded to allow details never before seen on R/C models.

Indoors

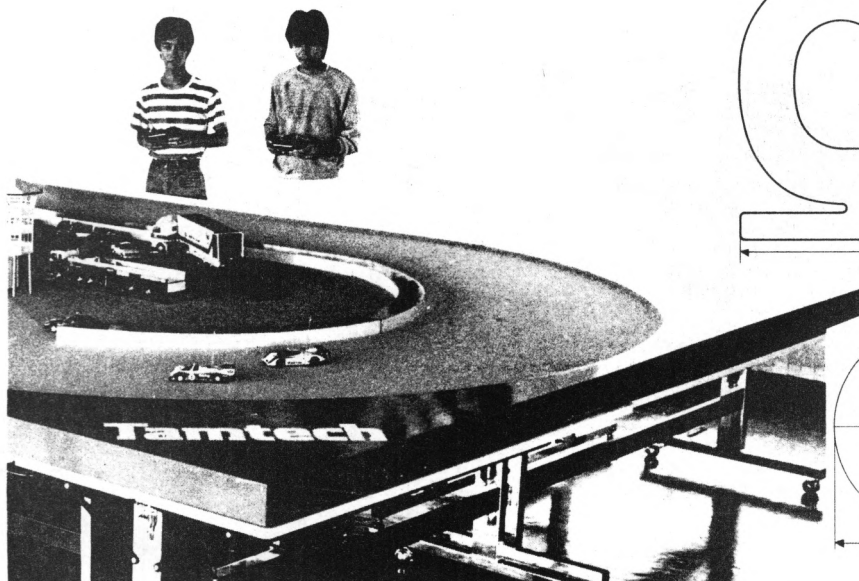

The Tamtech 1/24 radio control cars are only half the size of 1/12 scale models and have an overall length of about 210mm, and a width of about 80mm. This compact size requires minimum space for running as compared to the larger radio controlled cars. Crisp handling and smooth acceleration is built in for the utmost performance and enjoyment at the track.

Timed, speed, and gymkhana racing are some of the ways you can enjoy the Tamtech R/C cars. During speed races, a number of cars start at the same time and compete against each other while running a specific number of laps. While in a gymkhana race, cars start one by one to compete against the clock. If you race the Tamtech R/C car outdoors and have lots of space you can enjoy speed racing (heat racing). The road course (winding course like a race circuit) and simple oval course are typical for use. During this kind of competition, the first to complete a certain number of laps is the winner. Of course lap racing can also be done on the oval course in the same manner. When it is difficult to construct the oval or road courses, gymkhana races are recommended. Make up a course using empty bottles, etc. as obstacles, and determine the winner by counting the time required to complete the course. This kind of race will rapidly improve your radio control skills as it requires keen controlling of the car.

Who said that radio control car racing was just an outdoor sport? With the Tamtech radio control cars, this myth is not true. The advantage of small scale puts it out in front as the R/C car for racing in the house, and to prove that this car was designed for both in and outdoors, you can find within the kit, four different motor

pinion gears for altering car performance to track conditions. Four... 8T, 10T, 12T and 14T pinion gears that just about cover the wanted performance, required by you, the driver. Living room space is all you need to run this radio controlled car. Worried about overheating heat sinks? Not anymore, because the Tamtech R/C cars utilize a newly developed, amplifier operated speed controller, that allows continuous running without overheating problems. The speed controller is a forward/reverse variable type, providing all of the excitement expected from its compact size. Its amazing agility provides lots of versatility and amusement for the whole family. If you want to organize indoor race competition, a 90 - 150cm width, 8 - 15m lap length race circuit will be more than an enough space for competition excitement. Half the size of a 1/12 scale car and yet it has everything you could ask for in a high performing electric powered radio control racing machine. You don't even have to worry about bad weather, day or night, when you're indoors having fun. The Tamtech R/C

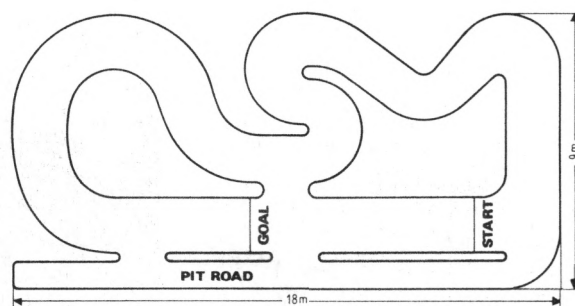

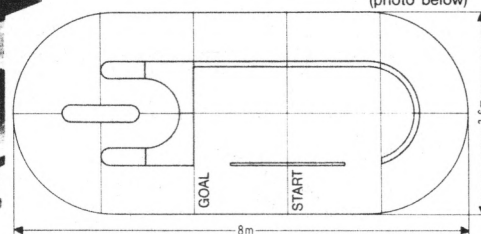

cars can also serve as practice vehicles for the larger radio controlled cars, since it can be run at any time desired. Use it to train and keep your radio control abilities in tip top condition. With the Tamtech, you can have radio control excitement 24 hours a day.

Here are some tips in constructing an indoor circuit that may be helpful. The example shown has a track width of 45 - 85cm, a lap length of 23m with a 5m straight stretch. The track utilizes a thin layer of carpet for better gripping of the sponge tires, and the track is designed to be used as an oval track or a technical track with "S" turns, additional towers, pit stops and other scale cars make it a beautiful racing circuit diorama.

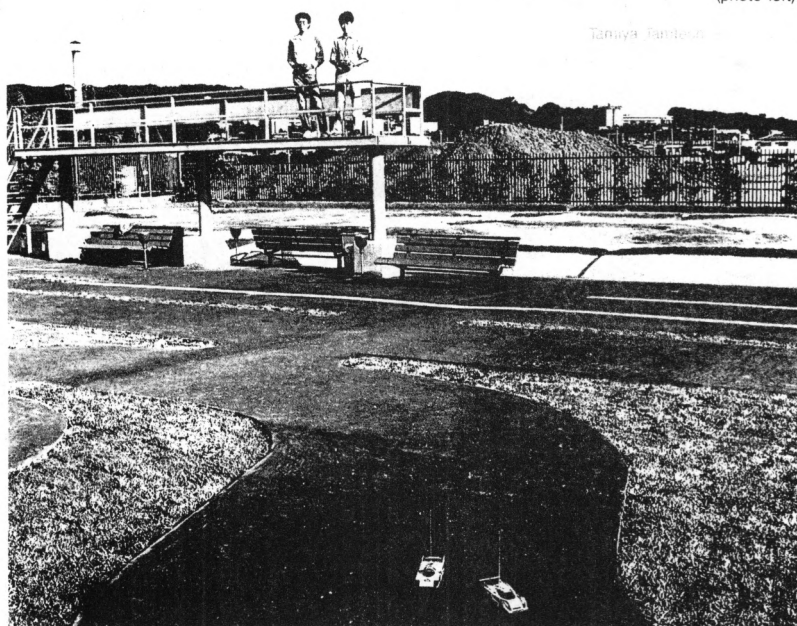

The Tamtech is in 1/24 scale, therefore some of the 1/24 scale model bodies available from Tamiya, such as the Mercedes-Benz 500SEC, BMW M635CSi and the Testarossa will fit the chassis of this R/C car with only minor modifications, allowing you to organize Group A races. Others can also be fitted if the wheelbase and tread can be matched. A life like, action packed, diorama using the Tamtech R/C cars can be made.

● Track width: 1.5 - 1.8m ● Lap length: 53m (photo below)

● Track width 0.45 - 0.85m ● Lap length: 23m (photo left)

Outdoors

Talking about the excitement indoors, don't forget that this car is also made to perform outdoors too. Construct a compact race track on a flat paved area such as a parking lot, etc. Obtain a space about the size of four full-sized cars, and use rope or hose to outline the track, secure it, and you're ready for a mini-size Grand Prix racing treat. Using the hose is recommended because the flexibility will protect the car from damage during collisions. Widen the race track, if required, for additional competitors during heat races.

The example of an outdoor circuit has a track width of 1.5 - 1.8m, lap length of 53m, and was constructed for use as a high speed test track,

plus plenty of room for six speeding racers. Another feature of this track is the long pit road. Since the first out Porsche 962C and the Lancia LC2 racers are also famous for their active involvement on the endurance racing scene in the real world, staging an endurance race can also be just as exciting and worthwhile. A fully charged Ni-Cd Tampack battery offers 8 - 15 minutes of pure racing enjoyment. Of course the running time differs according to the pinion gear used, but this should be a good indication that the Tamtech R/C cars provides you just about the same running time as the larger R/C cars.

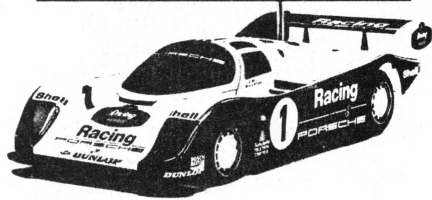

All along, we've been telling you how small and powerful the Tamtech radio control car is, and how it can be compared to the bigger scale radio controlled cars, and its superb performance. Now the only thing we want to add is how compact and easy this set can be when it comes to moving around. The whole Tamtech system is so compact, it can almost fit into a brief case, and that's important if you are a traveling radio control buff.

TAMTECH R/C SYSTEM

The 1/24 scale Tamtech radio control series car models are designed for radio control operation, to provide the modeler with the thrill and satisfaction of building and controlling a precision scale miniature model. Enjoy organizing races and experience the true meaning of this radio control sport.

TAMTECH CAR KIT

PORSCHE 962C

The Tamtech Car Kit contains the same high performance car as in the Tamtech Complete Set except for the Tamtech radio control unit, and Ni-Cd 7.2V-270mAh Tampack battery. This kit allows you to collect the entire series of cars without radio control units, adding the radio control units at a later date, or when required.

LANCIA LC2

The Lancia LC2 rivals the Porsche 962C in the real world of racing, and it is only natural to include this superb car in the series. The Lancia LC2 Tamtech Car Kit contains the same high performance car as in the Tamtech Complete Set except for the Tamtech R/C unit, and Tampack battery.

TAMTECH 201 R/C SYSTEM

TAMTECH 201 TWO CHANNEL R/C UNIT

The Tamtech radio control unit was developed in conjunction with the Futaba Corporation exclusively for the Tamtech radio control car series. The amplifier operated speed controller and receiver are combined in the C.P.R. (Control Processing Receiver) unit and obtains its power from the running battery. The Tamtech radio control unit can be widely used in miniature cars. Different frequencies are presently available for the radio unit.

BATTERY & CHARGER

TAMIYA Ni-Cd BATTERY 7.2V-270mAh TAMPACK

TAMIYA Ni-Cd 7.2V-270mAh TAMPACK BATTERY QUICK CHARGER

TAMIYA Ni-Cd 7.2V-270mAh TAMPACK BATTERY

This is a powerful, small Ni-Cd battery developed for the Tamtech R/C car series. It consists of six 1.2V-270mAh Ni-Cd batteries in series, to provide excellent acceleration and performance. It is also economical, as it can be charged more than 500 times.

TAMIYA Ni-Cd 7.2V-270mAh TAMPACK BATTERY QUICK CHARGER

This charger enables you to quick charge your 7.2V Tampack battery in about 15 minutes using a car cigarette lighter. The charger is equipped with a timer and a pilot lamp to ensure safe trouble free charging of your battery.

TAMTECH SPARE PARTS

FK-180SH MINI-BLACK MOTOR

FK-180SH MINI-BLACK MOTOR

This is a powerful high performance electric motor for the Tamtech radio controlled cars. The connectors are pre-wired and can be installed easily without any soldering. A good performing motor is a must in maintaining the high performance of these radio controlled cars. Replace a worn out motor at an early period.

SPONGE TIRE with WHEEL

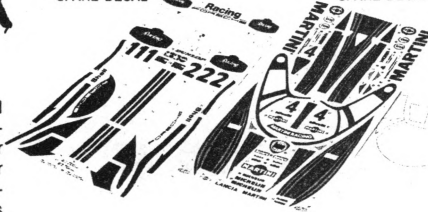

Worn out tires hinder the performance of the car. Replace worn tires at an early stage to maintain stability and handling at the track. Tires are pre-fitted to the wheels for quick replacement.

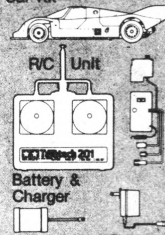

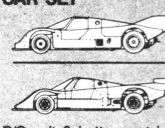

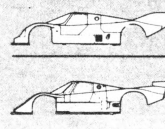

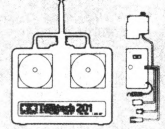

SPARE DECAL

These decal sets are for redecorating, or replacing dirty and damaged decals for the Tamtech radio control car series.

A LOOK IN THE FUTURE

TAMTECH R/C CAR 1/24 FORD MUSTANG PROBE GTP

Model Rectifier Corporation,
2500 Woodbridge Avenue, Edison, N.J., 08817

KIT NO. 2108

AERODYNAMIC BODY STYLING VIA WIND TUNNEL TESTING

Following the BMW GTP, Ford's Mustang Probe GTP now appears in Tamiya's Tamtech R/C car line up. In 1983, Ford, in combination with Zakspeed U.S.A., debuted the Mustang GTP, which was replaced in 1985, by this beautiful Mustang Probe GTP. It is a prototype vehicle which was designed to research and develop new ideas and materials for future cars. It was built to race in the International Motor Sports Association's (IMSA) Camel GT series. The body styling is the result of more than 250 hours of wind tunnel testing.

This 1/24th scale model of the

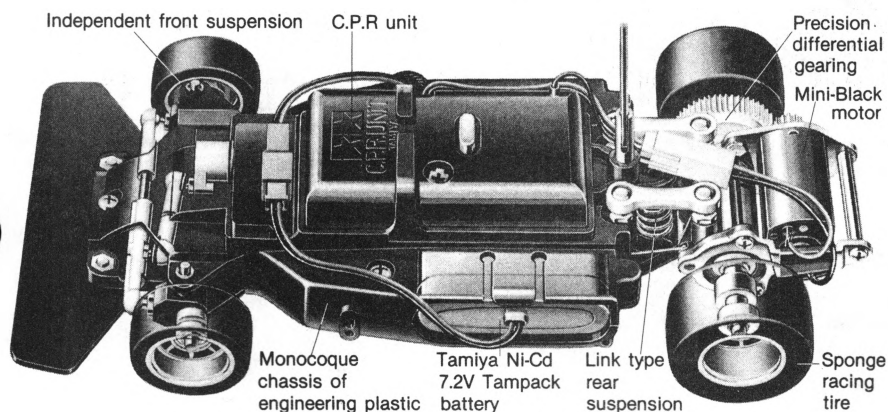

Tamtech

Mustang Probe also has this same well-tested styling. The sturdy and highly detailed kit body is injection molded with the clear windows installed, making for quick and easy completion of the detailing. The kit includes the colorful markings of the 7-Eleven convenience store chain. The other Mustang Probe wears the Budweiser Beer markings. You can, of course, make up your own original color scheme, using Tamiya's acrylic paints.

HIGH PERFORMANCE COMPONENTS PROVED OUT IN PREVIOUS TAMTECH RACERS

The Tamtech Mustang Probe GTP has the same outstanding running performance as the previous Tamtech racers of Porsche 962C, Lancia LC2 and BMW GTP. A monocoque type chassis, consisting of an upper and lower half, is made from light and sturdy engineering plastics. The front and rear suspension, damped with coil springs, and sponge tires, keep the car sticking to the track during races. The combination of Mini-Black motor and Tampack 7.2V-270mAh battery enables the model to run like the full-sized Mustang Probe GTP.

In addition, the Complete Kit includes the C.P.R. unit with the amplifier operated speed controller, receiver, and the steering servo wired to it. Of course, since the Tamtech 201 transmitter is also included, the Complete Kit is best suited for R/C beginners or those just starting out in the hobby.

COMING SOON!

GERMAN TECHNOLOGY COMPETING IN THE U.S.A.

The BMW firm of West Germany, renowned throughout the world for their high performance cars, began to compete in the IMSA GTP beginning with the 1985 season and using their GTP racer. Many American automobile races are organized by IMSA (International Motor Sports Association), and the peak event within IMSA, is the GTP (Grand Touring Prototype). This corresponds to the Group C races held on the European circuits. The full size BMW GTP is powered by a 4 cylinder turbocharged engine which was originally designed for Formula One competition use. Tamiya has now added this popular, attention-getting German racing car, to their Tamtech R/C car series.

EASY TO DECORATE INJECTION MOLDED BODY GIVES YOU THE TOPS IN LOOKS

The sturdy and highly detailed kit body is injection molded with the clear windows installed, requiring no assembly parts whatsoever, making for quick and easier completion of the body detailing. For the quickest completion, just over spray the entire body with gloss clear and add decals. Of course, original color schemes can also be easily done by using Tamiya Paints.

COMPONENTS THAT MAKE IT A TRUE COMPETITOR

Like Tamiya's previous Tamtech models of the Porsche 962C and Lancia LC2, the Tamtech BMW GTP incorporates a full monocoque type chassis made from light and sturdy engineering plastics. These state of the art components are matched to a balanced front independent suspension system, damped by professional coil springs, while the rear uses a link type 3 point suspension system with stabilizers that keeps the car sticking to the track all the way. The high grip racing sponge tires provides stability and control at all speeds.

TAMTECH EXCITEMENT...THE WAY TO GO!

With the BMW GTP now joining the lineup, and the series teeming with excitement, why wait any longer? If you're just getting started in the field, the Complete Kit includes everything necessary, such as R/C unit, Ni-Cd battery, charger and car. Or perhaps you're one of the already-

involved enthusiasts who only needs the Car Only kit. It matters not to what degree your radio control experience is, one thing is for sure...Everyone will enjoy the hours of excitement that the Tamtech series of R/C racing cars can bring to the whole family.
